Mr. Clinton D. Woods
Bureau of Reclamation
Ogden, Utah

Dear Mr. Woods:

April 22, 1963, Mr. Floyd Barnett, Ogden River Commissioner, requested the repair of three river stations to provide an adequate and accurate measurement of the inflow to Pine View Reservoir. It appears that the responsibility of maintaining these stations is with your agency.

We recommend that you make the requested repairs. It is possible that you could obtain assistance through the United States Geological Survey.

We know you will make these modifications and repairs as soon as possible in order that we may continue to maintain our high standard of record keeping.

Yours very truly,

Wayne D. Criddle
STATE ENGINEER
